

# SURF LIFE SAVING AUSTRALIA

## COVID-19 Vaccination Position Statement

Surf Life Saving Australia (SLSA) and its member organisations involve people from all states and territories, with the mission to save lives, create great Australians and build better communities.

We deliver a safe environment in Surf Life Saving and want to ensure that we continue to play our role in keeping lifesavers and the community safe during this pandemic.

Vaccinations save lives, and we strongly encourage all our members and employees who can get vaccinated against COVID-19 to do so for the benefit of each other, for those who visit our coastline, and for the wider community.

To check the eligibility and availability of the COVID-19 vaccines in your state please refer to your SLS State Centre – [click here](#).

For more information about how to protect yourself, your family and the community, information on vaccinations as well as the current COVID-19 status across the country, please [click here](#) and check your relevant state/territory health agencies for further advice.
